Information for Customers

How to Send Money Safely

Our Terms are Cash with Order,—Money may be sent at our risk by Post Office Money Order, Bank Draft, Express Money Order, money (not stamps) in registered letter.

Lost Orders,—After a reasonable time if you do not hear from your order, please write us again, giving a duplicate of the order, stating when and by what method remittance was made, and we will promptly investigate. If the remittance is made by Money Order or Bank Draft, a duplicate can be secured.

Please do not Send Stamps for Money,—They often come stuck together, making them worthless. Silver in small sums, if carefully wrapped, will carry just as safely, and is far more acceptable.

Canadian and Foreign Postage Stamps will be returned, as they have no value here.

Canadian Customers,—Canadian laws prohibit sending dormant Roses or Shrubs into Canada except from March 15 to May 15, and from October 7 to December 7, through the following custom ports, where they will be fumigated: St. John, N. B.; St. Johns, Quebec; Niagara Falls and Windsor, Ontario; Winnipeg, Manitoba. All other goods, including our pot-grown Roses grown under glass, are admitted at any time. Owing to the rate of postage on Canadian orders we must request an additional twenty per cent. to cover postage.

Foreign Orders,—Twenty per cent. extra should be added to orders going outside of United States or its colonial possessions, to pay extra cost of packing and postage. To countries with which we have a parcels post, goods can be sent by mail. They also can be sent by express, but the person ordering must give the name and address of some one in New York who will receive the goods, pay the ocean charges and forward them. We pack lightly and safely, and the charges, even to the most distant points, are very reasonable.

Our Guarantee is the best that can be given by any reputable firm, to deliver goods to you in first-class growing condition and failing therein to replace them immediately and if not satisfactory to so notify us at once, and any mistake or dissatisfaction will be adjusted. Dingee Roses have given universal satisfaction for over half a century.

Parcel Post.—All goods offered in this book, except two-year-old Roses and Shrubbery, which are sent by express at purchaser's expense, are at postpaid prices, and will be sent that way unless otherwise ordered or in our judgment it would be best to send them by express prepaid. Parcels weighing twenty pounds can now be sent by Parcel Post. We, however, reserve the right to send it the best and cheapest method.

Parcel Post C. O. D.—If you desire your order, no matter how small, sent C. O. D. by Parcel Post we can do so, at an additional cost of 10 cts. and the small fee for the money order, which is 3 cts. up to $2.50; 5 cts. up to $5, making it much cheaper than by express, as you have the express charges and additional charge for returning money. Thus if your order amounts to $1.50 we will send it C. O. D. by Parcel Post if you desire and the amount collected by the Postmaster upon delivery would be only $1.63.

Premium Plants.—We always do better than we promise in the way of extra plants, so when the order will at all afford it, we add to it some plant or plants gratis, often choice new kinds. Several of the Roses now so eagerly sought after were first introduced to our customers in this way—presented with their order.
Dingee Surpassing Quality Tulips

The dazzling beauty of the Tulip family is so well known that it is hardly necessary to further extol its merits here. The brilliancy of colors when arranged in masses in the garden, on the lawn, or grown indoors in pots or boxes, makes the Tulip an object of striking beauty; indeed, for wealth of bizarre color effects, it even surpasses the hyacinth. Planted plenty of these, they are so inexpensive; in early Spring, almost before the last snows of Winter are gone, the gorgeous colors of their flowers will add a wonderful air of cheerfulness to your home surroundings. They are entirely hardy in the open ground, and should be planted about 4 inches deep and 4 inches apart. For indoor culture plant them 3 inches deep.

Like all Dingee bulbs, our offerings in Tulips are the best, both as regards quality and variety. No “seconds”—each bulb is guaranteed to be a good, sound blooming bulb of the first size, or your money back.

The varieties here listed are the very best of all the long list produced in Holland, selected with scrupulous care with the desire to offer our friends the very best of their kind.

**Indoor Culture.** Plant in pots or boxes, using ordinary garden soil, any time from September to February. Plant about two inches deep. Water thoroughly and put away in a dark, cool place until signs of growth commence, then bring into the light and heat. For holiday blooming, pot early in September, and for a succession of bloom, plant at intervals of about two weeks. To grow in water, place the bulbs in glasses and fill with clean water; leave them in a dark, cool cellar until the glass is well filled with roots, then bring to the light.

**Open-Ground Culture.** Select a warm, sunny location. Ordinary garden soil, enriched with well-rotted stable manure, spaded to a depth of 12 inches, will suffice. Plant the bulbs 5 inches deep and 6 or 7 inches apart. Set out any time from September until severe freezing weather. While not required, it is better to give Winter protection. Large exhibition-size bulbs, 15 cts. each, $1.50 per doz., $12 per 100, post-age paid.

Dingee Early-Blooming Crocus

Since the poet sang, "A soft breeze kissed the expectant morn, a bluebird sang a witching strain, a Crocus bloomed and Spring was born," this charming little flower has been noted as the first of the Spring-time. The attractive flowers mark the coming of spring and, with their beautiful shades tone the deepening green of the lawn. It is entirely hardy and, left undisturbed, will continue to bloom each year.

The best results with Crocus are obtained when they are given a rich, dry soil and sunny location. The bulbs should be planted about 3 inches deep, 2½ inches apart; set singly or massed in beds. A favorite plan is to raise the soil with a spade or trowel to the depth of 3 inches, place the bulb beneath the sod and press back into place. Crocus are also great favorites for house culture, giving very satisfactory results. For blooming indoors the pots or pans in which they are planted should be plunged outdoors until a hard freeze or so. The bulbs we offer are of improved strains of the leading and finest varieties, and are superior as regards both form and color.

Dingee Hardy Narcissus

The Daffodils of Spring

The Narcissus is most desirable for house or garden culture, and should be treated in the same manner recommended for the Hyacinth. Three or four bulbs may be grown in a single pot. In the garden they may be planted in any out-of-the-way place, where they will continue to thrive and bloom year after year without any care or attention, and will be among the first to respond to the fitful blandishments of early spring. The family is an extensive one and remarkable for its novel diversity of types and colors, in the selection of which our efforts have been to secure the finest specimens. Our bulbs are grown for us by our own special grower on the Isle of Guernsey; they are the best.

First Quality Bulbs, sure to bloom. Prices include postage.

**Japanese and German Irises**

**The Rainbow Flower of the Greeks, and the Fleur de Lis of the French**

The memory of the “Blue Flag” of the old-time gardens is one ever sweet to those whose lives were lived in such surroundings, and while the “modern” Irises, if we may use the term, will remind one of the old days, they, too, like everything else of these days, have yielded to the influence of improvement, and there has been evolved a race of flowers absolutely bewildering in the glory of their form and color.

Not the least valuable of their charms lies in the fact that their flowering period covers such a long time in early Spring and Summer, and with a proper selection it is possible to have Irises in bloom in the garden from early in March, while snow is still on the ground, to late in July, when the magnificent Japanese Irises, arrayed in their splendor of purple and blue and gold and white, with flowers often a foot across, end the glorious procession. Hardy everywhere and, once planted, they last a lifetime.

Our New Guide to Rose Culture for 1915

Will be ready to send out January 1, 1915. It is acknowledged authority on matters pertaining to the culture of Roses, as well as all other flowers of worth. It will be sent free to customers of the past few years, also to those who order from this book. To others free upon application.
Dingee Pot-Grown Own Root Roses for Fall Planting

For several years we have offered our customers pot-grown, own-rooted Roses for Fall Planting and since then they have proven so satisfactory that we cannot emphasize too strongly the advisability of Fall planting during the months of August, September, October and, in the South and Southwest, November.

We were the first in America to produce the Rose plants suitable for this purpose. Since then the proposition has been introduced generally, but we still maintain the lead in both quality and quantity of these famous Dingee pot-grown rose bushes for immediate planting.

Two-Year-Old Roses Offered

on the following pages have been specially prepared for Autumn planting and are shipped by express, leaving the soil in which they have been growing on their roots, and the change does not check their growth in any way.

Our list is exceedingly complete and embraces all the leading varieties of roses. These plants have been resting all summer and are now growing in large pots and may be planted anywhere in the United States with entire safety. One great advantage they have over field-grown roses is that they have been grown in pots or crots and may be transplanted at your convenience, whilst field-grown plants are only good for planting late in the Fall, after they have become dormant, which gives them no chance in the average locality to be shipped and planted in time to become established before Winter.

Our famous Dingee pot-grown Roses, planted in August, September, October and November, according to color characteristics, will guarantee a bloom on the plants on arrival after Fall plantings, and we must urge this again and again: the sooner these plants are planted in your gardens the better the bloom for next Spring.

The chief reason that we are able to prepare such a low cost of this splendid assortment of roses is our growing equipment, which is now the foremost in America.

The important point is plant early. Protect with evergreen boughs, leaves and litter, and then these varieties will invariably go through the Winter safely. All Roses offered in this book are pot-grown and especially suited for Winter blooming indoors, and have been specially selected with that purpose in view.

Pink Killarney

This Queen of the Irish Roses excels any other of its class and color yet introduced, and by many is recognized as the most beautiful, hardy, everblooming Hybrid Tea Rose now under culture. Each season since it was introduced Killarney has increased in popularity, and the demand has always exceeded the supply. We have an immense quantity, however, and guarantee every plant to be true to name. The bush is strong and upright, with beautiful, deep bronzy green foliage, and the Rose is entirely free-blooming, bearing immense, long, pointed buds and massive flowers on big, heavy shoots. The color is deep, brilliant and sparkling shell-pink, of the most exquisite shade. The flowers are of delightful fragrance, immense size, and have thick petals of great substance. Killarney is unusually hardy and without protection has stood severe winters as far north as Boston. Strong one-year-old plants, 20 cts. each, 3 for 50 cts.; larger size, 30 cts. each, 4 for $1, postpaid. Extra-strong, two-year-old plants, on own roots, 50 cts. each.

Yellow Killarney

Mme. Jenny Gillemot

A brilliant saffron-yellow Rose, opening canary with dark golden shades. The buds are long and pointed, beautiful in form and color, the flowers are large with immense petals. Hardy and vigorous, it is constantly in bloom all summer. Blooms produced on long, stiff stems, making an excellent Rose for cutting. Owing to its resemblance to the Killarney, we have called it the Yellow Killarney, as it makes a good companion for them. 20 cts. each, 3 for 50 cts.; larger size, 25 cts. each; two-year-old plants, 45 cts. each.
Dingee Famous Hybrid Tea Roses

This class of Roses has the meritorious advantage of blooming continuously the first year like the Tea Roses, while their large, finely-formed flowers and delicious fragrance, diversity of color and constitution to stand Winters with slight protection, make them best for general planting and like the Tea Roses.

The Best Roses for Winter Blooming

There are none better for Winter blooming. They are sure to give the utmost satisfaction. The plants have been specially prepared for the purpose, and are strong, stocky and thrifty. When received, plant in four-inch pots or boxes, water freely and give as much light and sunshine as possible.

Continuously from early Spring until late Fall, with pointed buds, the large, double flowers are glorious in their perfection; borne on long, stiff stems; delicate pure white, deliciously fragrant. Unexcelled for cutting; absolutely hardy.

Jelena Cambier. The colors range from salmon-rose to coppery-rose.

Camoens. A bright, handsome Rose of a dainty shade of China rose suffused with pale yel-low. It is a hardy, free flowering and vigorous Rose.

Dean Hole. One of the handsomest of the Hybrid Teas, growing into a stout, vigorous, hardy bush, bearing all Summer great numbers of gorgeous, silvery carneous Roses with salmon shading. The coloring is distinct and unique, and the Rose is a handsome tribute to him whose name it bears.

Pink La France. Lovely shade of silvery pink, tinged with salmon; fragrance delicious; flowers very full and wonderfully beautiful.

White La France (Augustine Gulnoisseau). A pure white member of the La France family.

General McArthur. To those who prefer a Rose with full color, we can recommend none more highly than this gorgeous crimson-scarlet Hybrid Tea. It is hardy in practically all localities, and as an outdoor Rose it has no superior. Of strong, vigorous, healthy growth, branching freely, it produces its wonderful blooms profusely from May until October. Every shoot car-

Plant two-year-old Roses now and enjoy an abundance of blooms next season.

HYBRID TEA ROSES—Continued

Rhea Reid

A Magnificent New Crimson Garden Rose

"As large as American Beauty, as double as La France and as red as Richmond," is the enthusiastic way the originator describes this beautiful new Hybrid Tea Bush Rose. The vivid scarlet-crimson color is a marvel of beauty, large, bold and of splendid substance. It has a strong, disease-resistant constitution, makes a rapid growth and throws up a profusion of canes from the roots and is always blooming. As an all-round garden bush Rose it has no superior.

Mad. Abel Chatenay. Best of its color—rosy carmine, with darker shade. It does remarkably well in the open ground, has wonderfully beautiful flowers, which are full, deep and double. A very hardy Rose, Chatenay is a strong grower and free bloomer and has won friends wherever it has been planted. We have a large stock of superior quality, and urgently recommend all our customers to include Mad. Chatenay in their Rose orders for this Spring.

Virginia R. Coxe. For intense and dazzling color there is no other Rose to compare with this splendid kind. The flowers are large and handsome, moderately double, of splendid substance, and are produced in amazing profusion during the whole of the growing season; in fact, it is always in bloom. The color is fiery crimson, shaded with a dark velvety sheen, a combination found in no other Rose.

Triumph de Pernet Pere. A French Rose, originated by Jean Pernet, of France. Flowers large, with brown, rich and long, pointed buds. Delicious Tea fragrance. Clear magenta-red, passing to bright crimson.

Wellesley. A most magnificent garden Rose of a beautiful shade of pink, vigorous, healthy grower; remarkably free-flowering, with fine keeping qualities; most valuable Rose for gardens as it is particularly adapted for outdoor culture. Blooms produced on long, stiff stems.

Radiance. A glorious new extra hardy Hybrid Tea Rose which originated within a few miles of West Grafton. The flowers are of a beautiful blending of shades of carmine-rose, with opal and coppery reflections. It is of splendid, sturdy growth, constant in bloom, and is bound to become one of the leading garden Roses. We cannot say too much in its praise. Awarded a Silver Medal by the American Rose Society at Hartford, Conn., Trial Gardens as the best bedding Rose.

My Maryland. Handsome in bud and flower. A rare combination of a poetic name and exquisite beauty has made this Hybrid Tea Rose a dangerous rival of Killarney. Its brilliant, lively shade of pink and beauty of form is without a superior, and all summer through large, perfectly double, magnificent flowers, rich in fragrance, are borne on long, stiff stems, growing from a sturdy, fine-shaped bush, which in itself is a distinct ornament to the garden. A great outdoor Rose. Extremely hardy.

Pius X. Glorious Pink Rose. A delicious creamy white Hybrid Tea, passing to tender rose, with a deeper shade of pink on the center petals. The flowers are of handsome cup shape and borne on long stems. A vigorous grower and in every respect it is an ideal garden Rose—one which is bound to become popular.

Dingee Ever-blooming Tea Roses

While not so hardy as the Hybrid Teas or Old Perpetuals, yet with protection they will live through the Winters in almost all sections of the country, except in the extreme North. In the South, they are unexcelled whether planted in the open ground or used for pot culture. The fact that one-year-old plants produce a profusion of flowers makes them indispensable to every Rose-lover.

The Wonderful Rose
Charles Dingee

Note photographs in natural colors on inside front cover.

The almost unlimited resources of our great West Grove greenhouses have been severely taxed to propagate enough plants of this remarkable Rose to meet the demand for it, and even now we have not an oversupply. The unprecedented demand for this remarkable Rose was so great last Spring that it almost exhausted our immense stock and we can offer only one-year and two-year plants at this time. Charles Dingee Tea Rose blooms continuously, producing immense, deep, double, grandly formed flowers on long, stiff stems, the beauty of which is nothing short of superb. The color is a delicate blending of rose tints in the center, which gradually shade off into pale blush and creamy white. Perfectly hardy in all localities, it is sure to become the most popular Rose of the day, because it is the most beautiful, and for Winter culture indoors, in pots or boxes, it cannot be surpassed. It is never out of bloom.

Dingee Famous Hardy Hybrid Perpetual Roses

There is little question that Hybrid Perpetual Roses, or "June Roses," as they are sometimes called, are the most valuable of all hardy plants. They are of vigorous, upright growth, have large, bold flowers, frequently measuring 5 to 6 inches in diameter, and are deliciously fragrant. These Roses will succeed in any locality and are so hardy that they will live through the severest winters with but a light protection of leaves or coarse manure. Some of the kinds do not bloom until the second year, but, when fully established, they all bloom freely at the usual time, early in the season. The Hybrid Perpetuals will stand hardship and neglect, but give much better results with good cultivation and rich soil. Always plant in open ground, as these Roses are not suitable for house culture. Our collection of Hybrid Perpetuals is by far the best in the country. The plants we send out are strong and hearty and on own roots. Fall is the most suitable time for planting these.

Prices of all Roses in this section, except where noted: First size, 15 cts. each; any 4 for 50 cts.; 9 for $1; larger size, 20 cts. each; 3 for 50 cts.; two-year-old plants, 45 cts. each, by express.

Dinée Hardy Climbing Rose

Hardy Climbing Roses have the popular call. They have become an absolute necessity for beautifying the home, porches, pergolas, and pergolas, and they make the most beautiful flowered hedges when trained on low supports. Climbing Roses in our unequalled list are on their own roots—a most valuable point in a Climbing Rose. Some are absolutely hardy in the coldest parts of the country, while others, growing luxuriantly in the Southern States, require some slight protection in the North. Fall planting is particularly recommended for this class of Rose, as they make much better growth the following season than if planted in the Spring. They are pot grown and sold in the fall condition. Order early and give them a chance to establish.

D & C Winter - Blooming Carnations

As a Fall- and Winter-blooming plant for house culture, we recommend the Carnation as one of the very best. It is as easily grown as a Geranium and equally satisfactory. You know how high-priced Carnation blooms are during the Winter. Don't buy them—grow them yourself. You can have an abundance of flowers at a trifling cost. Follow these directions and you will succeed. Plant in good soil, give plenty of water and drain well. Let the plant be cool at night; this is an important requirement. A 40-degree to 50-degree temperature is about right. Keep the dead foliage picked off. We offer extra-large, field-grown plants; they will bloom continually throughout the Winter. Fine plants can be sent by mail; it is best, however, to send them by express when possible, as they arrive in much better condition.

Remember, we do not offer small 2 ½-inch pot plants. This is large, field-grown stock, and should be grown in 5- and 6-inch pots and boxes. The plants will be well set with flower-buds when sent out. Absolutely clean and healthy. Our stock this year is the best we have ever had.

New Varieties

Alma Ward. New white variegated.
Gloriosa. Pure deep pink.
Rose-Pink Enchantress. Deeper pink than Enchantress.

Asparagus Plumosus

Feathery or lace-like foliage on long, slender stems. 20 cts. each, 4 for 50 cts.; larger size, 20 cts.

Dingee's Flowering Begonias

A beautiful class of plants, with free-blooming qualities. The foliage is attractive and odd, while the flowers are exceedingly graceful and beautiful. Their colors include the most brilliant shades of red, yellow, crimson, salmon, etc., and make a display which is hardly equaled by any other class of house plants.

Price, except where noted: Strong plants, 15 cts. each, 4 for 50 cts.; 9 for $1, postpaid.

Glorie de Lorraine

The handsomest of all flowering begonias and one of the best house plants ever introduced. All Winter long it is a mass of soft, rose-pink flowers, and we know of no plant which is more beautiful for home ornamentation. Strong, healthy plants, 40 cts. each, 2 for 75 cts., postpaid.

OF all the house plants and flowers intended to cheer up the cold, dull days of Winter in the home, none will do it with greater success than our new, magnificent Amaryllis, Empress of India. Words are inadequate to describe its wondrous form and color, and we can give but a feeble idea of the joy coming to our many friends who will plant this wonderful flower this Fall.

Each bulb sends up several spikes, each crowned with a glory of massive flowers in clusters of four to six, each flower measuring 6, 8 or 10 inches in diameter. And the colors—a bewildering riot of them. Some barbaric in their splendor of deep crimson; others in shades of pink, while others are almost pure white with brilliant splashings of intense crimson and dainty pink—all of them perfectly ravishing in their beauty.

Plant the bulb in good, rich, fibrous soil and sand in a pot not much larger than the bulb, or three bulbs in a 12-inch pot. Let the top of the bulb be about level with the soil, which should not come closer than one inch to the top of the pot. During the blooming season water freely and give an occasional application of weak liquid manure. After the bulb is done flowering withhold water gradually, and allow the bulb to rest.

We offer the bulbs in two sizes, sure to bloom. Our stock is large, but we will not have enough to go around, so early ordering is necessary to avoid disappointment. First size bulbs, 60 cts. each, 2 for $1. Mammoth bulbs, 8 to 12 inches in circumference, $1 each, postpaid.

Other Members of the Amaryllis Family
